TECH 581

Consulting for Technical Professionals

This course explores the application of technology and technical management skills to working with business, industry, or various professions in solving specific problems for an organization as an internal or external consultant. Students learn how to involve clients in all phases of problem identification and solution with the goal that, at the end of a consulting assignment, the clients are able to sustain the necessary changes in their organization. Particular attention is paid to managing expectations among change agents, managers, executives, technical professionals, and other members of the organization. The course will cover the most critical, high-level, functional frameworks used by top consulting firms today as well as the tools commonly used by consulting professionals.

Lecture: 3 Lab: 0 Credits: 3

TECH 597

Special Problems in Technology

Independent study and projects in applied technology that are multi/cross-disciplinary not tied to a specific department.
