

# ADVISING

---

Each undergraduate student is assigned a faculty and/or professional academic adviser who is available to discuss opportunities and career plans in the student's chosen field and to plan and approve coursework to meet departmental and university requirements. Students are urged to consult their advisers when questions arise.

Department and College advisers and advisers in the Office of Academic Affairs are also available to answer questions and interpret policies regarding university requirements and academic procedures. Where necessary, the Office of Academic Affairs, under the authority of the Provost, provides the standing interpretation and application of policy.
