

RESIDENCE REQUIREMENTS

All undergraduate degree-seeking students must observe the following residence requirements:

- Once enrolled at Illinois Institute of Technology, a student is not permitted to enroll at another institution without obtaining permission. A student must submit an academic petition to the Office of Academic Affairs for approval prior to registration at another institution.
- A course completed at Illinois Institute of Technology can only be repeated at Illinois Institute of Technology. No transfer credit will be awarded for any course equivalent to a course completed at Illinois Institute of Technology.
- There is no maximum number of hours of transfer credit from a four-year college; however, the final 45 semester hours of any degree program must be completed at Illinois Institute of Technology. *Any proficiency examinations or enrollment at another institution must be completed before this period.*
- Any Co-terminal or Accelerated Master's Program with both bachelor's and master's components in the same department is to be considered a unified degree program for this purpose, and thus all graduate coursework in such a program may count towards these 45 semester hours.
